| 9 | Southern Representative Office | No.25/1, street 4BK, Binh Khanh ward, district 2, Ho Chi Minh city |

2. ACCOUNTING PERIOD AND ACCOUNTING CURRENCY

Accounting period

The Company's fiscal year begins on 1 January and ends on 31 December.

Accounting currency: Vietnamese Dong (VND).

3. ACCOUNTING STANDARDS AND ACCOUNTING SYSTEM APPLIED

The financial statements are performed in Vietnamese Dong (VND) and prepared under the accounting principles in conformity with the Vietnamese Corporate Accounting System issued in pursuance of Circular No. 200/2014/TT-BTC dated 22 December 2014, Circular No. 53/2016/TT-BTC dated 21 March 2016 of Ministry of Finance, Vietnamese Accounting Standards, and the relevant statutory requirements applicable to financial reporting.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies, which have been adopted by the Company in the preparation of these financial statements, are as follows:

Basis of preparation of financial statements

The financial statements are prepared on the accrual basis (except for the information related to cash flows), under historical cost principle, based on the assumption of going concern.

Estimates

The preparation of financial statements in conformity with Vietnamese Accounting Standards, the Corporate Accounting System, and the relevant statutory requirements applicable to financial reporting requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. The actual number incurred may differ from the estimates and assumptions.

Foreign currency conversion

The principles of foreign currency conversion are implemented in accordance with Vietnamese Accounting Standards (VAS) No.10 - Effects of Changes in Foreign exchange rates and the current enterprise accounting regime.

During the period, transactions incurred in foreign currency are converted to VND at the actual transaction exchange rate on the date of occurrence or the accounting record exchange rate. The resulting exchange rate differences are reflected in financial revenue (if a gain) and financial expense (if a loss). Monetary items with foreign currency origins are revalued at the actual transaction exchange rate at the end of the accounting period. The exchange rate differences from revaluation are recognized in exchange rate differences, and the balance is transferred to financial revenue (if a gain) or financial expense (if a loss) at the end of the accounting period.

Cash and cash equivalents

Cash reflects the full existing amount of the Company at the end of the accounting year, comprising cash on hand, demand deposits and cash in transit.

Cash equivalents comprises short-term investments with terms less than 03 months since the date of investment that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value at the reporting date and recorded in accordance with Vietnamese Accounting Standard No. 24 - Cash flow statement.

Financial instruments

Initial notes

Financial assets

According to Circular No.210/2009/TT-BTC dated November 6, 2009, issued by the Ministry of Finance, financial assets are classified appropriately for the purpose of disclosure in the financial statements into financial assets recognized at fair value through profit or loss, loans and receivables, held-to-maturity investments, and financial assets available for sale. The Company determines the classification of these financial assets at the time of initial recognition.

At the time of initial recognition, financial assets are determined at cost plus any directly attribute transaction costs related to the acquisition of those financial assets. The Company's financial assets include cash and cash equivalents, trading securities, held-to-maturity investments, receivables from customers, loans receivable, and other receivables.

Financial liabilities

According to Circular No.210/2009/TT-BTC dated November 6, 2009, issued by the Ministry of Finance, financial liabilities are classified appropriately for the purpose of disclosure in the financial statements into financial liabilities recognized at fair value through profit or loss and financial liabilities measured at amortized cost. The Company determines the classification of these financial liabilities at the time of initial recognition.

At the time of initial recognition, financial liabilities are determined at cost plus any directly attribute transaction costs related to the issuance of those financial liabilities. The Company's financial liabilities include payables to suppliers, accrued expenses, other payables, loans, and finance lease liabilities.

Value after initial recognition

The initial value of financial instruments is reflected at fair value. In cases where there is no provision for re-determination of fair value of financial instruments, they are presented at book value.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and presented at their net value on the balance sheet if, and only if, the Company has a legal right to offset the recorded amounts and intends to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

Receivables and provision for doubtful debts

Receivables are monitored in detail of the original terms, remaining terms at the reporting date, the receivable objects, original currencies and other factors for the Company's managerial purpose. The classification of receivables is trade receivables; other receivables shall comply with the principles:

- Trade receivables include commercial receivables incurred from purchase-sale transactions, including receivables from sale of exported goods under the trust for other entities;
- Other receivables include non-commercial or non-trading receivables, including: receivables from loan interests, deposit interests, amount paid on behalf of another party; receivables which the export trustor must collect from the trustee; receivables from penalties, compensation; advances; pledges, collaterals, deposits, assets lending...

The Company bases on the remaining term at the reporting date receivables to classify as long-term or short-term.

Receivables are recognized at amounts not exceeding their recoverable value. An allowance for doubtful accounts is established for receivables that are overdue by more than six months, or for receivables from debtors who are unlikely to pay due to dissolution, bankruptcy, or similar difficulties in accordance with the provisions of Circular No.228/2009/TT-BTC dated December 7, 2009, issued by the Ministry of Finance and the current enterprise accounting regime.

Inventories

Inventories are stated at a lower cost and net realizable value. Cost comprises direct materials and where applicable, direct labor costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost is calculated using the weighted average method. The net realizable value represents the estimated selling price less all estimated costs to completion and costs to be incurred in marketing, selling, and distribution. The Company applies the regular declaration method to accounting for inventories.

Provision for devaluation of inventories is the difference between the cost of inventories and their net realizable value at the end of the accounting period, and is established in accordance with the provisions of Circular No. 228/2009/TT-BTC dated December 7, 2009, issued by the Ministry of Finance.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation. Tangible fixed assets are recognized under the historical cost.

The original costs of tangible fixed assets from purchase comprise their purchase prices actually paid and any directly related costs to be paid by the time putting the fixed assets into a state of readiness for use.

Costs incurred after initial recognition are recorded as increase in the historical cost of assets if they actually improve the current status in comparison with the initial standard status of the assets, such as:

- Replacing components of tangible fixed assets that extend their useful life or increase their operating capacity; or
- Improving components of tangible fixed assets that significantly enhance the quality of the produced products; or
- Applying new production technology processes that reduce the operating costs of the asset compared to before.

Costs incurred for repairs and maintenance aimed at restoring or maintaining the economic benefits of the asset to its original standard operating condition, which do not meet any of the above criteria, are recognized as operating expenses in the period incurred.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives or net book value over the remaining useful lives in accordance with Circular No. 45/2013/TT-BTC dated 25 April 2013 of the Ministry of Finance. The estimated useful lives are as follows:

| | Years |
|--------------------------|-------|
| Buildings and structures | 03-30 |
| Machinery and equipment | 05-06 |
| Motor vehicles | 04-15 |
| Office equipment | 03 |

Intangible fixed assets and amortisation

Intangible asset is stated at cost less accumulated amortization, presenting softwares and long-term land used rights at Hai Phong branch. Software is amortized on a straight-line basis over an estimated useful life from 03 years. Long-term land used rights is not amortized.

Investment Property and Depreciation

Investment property reflects the value of land used rights and construction costs corresponding to the Company's ownership, including 06 commercial office floors and basements of the Comatce Tower Project, located at 61 Nguy Nhu Kon Tum street, Residential Area No. 17, Nhan Chinh ward, Thanh Xuan district, Hanoi city, built and held by the Company for achieving benefits in renting and are stated at cost less accumulated depreciation. The cost of investment properties is the Company's expenses (cash and cash equivalents) upon the construction completion of investment properties.

Investment property for lease is depreciated using the straight-line method, based on the estimated useful life, in accordance with the provisions of Circular No. 45/2013/TT-BTC dated April 25, 2013 of the Ministry Finance. The specific depreciation periods of investment real estate groups are as follows:

| | Years |
|--|---------|
| Land Use Rights (*) | - |
| Buildings and Structures | 42,5 |
| Infrastructure, Machinery, and Equipment | 10 - 15 |

(*): The Company does not depreciate the long-term land use rights corresponding to the privately owned part of the Company's Comatce Tower Project.

Construction in progress

Assets under construction for production, leasing, management, or any other purpose are recognized at cost. This cost includes necessary expenses to form the asset, including construction costs, equipment, other costs, and related borrowing costs in accordance with the Company's accounting policies. Depreciation of these assets is applied similarly to other assets, starting when the asset is ready for use.

Prepaid expenses

Prepaid expenses include actual expenses that have been incurred but are related to business activities of multiple accounting periods. Prepaid expenses include:

- Insurance costs are allocated according to the insurance period;
- Office leasing brokerage costs are allocated to the income statement in a 12-month period;
- Expenses related to the sale of houses through real estate trading floors are awaiting allocation; these expenses will be allocated to operating results when the Company generates revenue from real estate activities.

Payables

The payables are monitored in detail of the original terms, the remaining terms at the reporting date, the payable objects, original currency and other factors according to the Company's managerial purpose. The classification of payables such as trade payables, other payables must be implemented the following principles:

- Trade payables include commercial payables incurred from purchase-sale transactions, including payables when imported goods under the trust;
- Other payables include non-commercial or non-trading payables, including: payables for loan interest, payables for financial investments; amount paid for the third party; amount which the trustor receives from relevant parties to pay under the entrusted import-export transactions; asset borrowings; payables for penalties, compensation; surplus assets without reason; payables for social insurance, medical insurance, unemployment insurance, trade union; collaterals, deposits received, etc.

The Company bases on the remaining terms of payables at the reporting date to classify as long-term or short-term.

The payables are recorded not less than the payment obligations. In the case of there is evidence that a loss likely occurs, the Company recognizes immediately a payable under the precautionary principle.

Loans and finance lease liabilities

The loans and finance lease liabilities are monitored in detail of loan object, loan agreement, and loan asset; loan term and finance lease liabilities and original currency (if any). The loans and finance lease liabilities with the remaining term more than 12 months from the reporting date are presented as long-term loans and finance lease liabilities. The due loans and finance lease liabilities within the next 12 months from the reporting date are presented as short-term loans and finance lease liabilities.

Accrued expenses

Accrued expenses are recorded based on reasonable estimates of the amount payable for goods and services used during the period due to lack of invoices or insufficient accounting records and documents, including: loan interest; major repair costs of fixed assets, ship towing costs, etc.

Provisions payable

Provisions payable are recognized when all three of the following conditions are met:

- (a) The enterprise has a present obligation (legal or constructive) as a result of a past event;
- (b) It is probable that an outflow of economic benefits will be required to settle the obligation; and
- (c) The value of the obligation can be reliably estimated

Provisions payable are recognized based on the most reliable estimate of the amount that will be required to settle the present obligation at the end of the accounting period.

Revenue Recognition

Revenue from the sale of goods shall be recognized if it simultaneously meets the following five (5) conditions:

- (a) The company has transferred the majority of risks and benefits associated with the right to own the products or goods to the buyer;
- (b) The company no longer holds the right to manage the goods as the goods owner, or the right to control the goods;
- (c) Revenue has been determined with relative certainty. When contracts define that buyers are entitled to return products, goods purchased under specific conditions, enterprises shall only record turnovers if such specific conditions no longer exist and buyers are not entitled to return products, goods (unless the customer is entitled to return the goods under the form of exchange for other goods or services);
- (d) The company has gained or will gain economic benefits from the good sale transaction; and

(e) It is possible to determine the costs related to the goods sale transaction.

Revenue recognition from services rendered if simultaneously satisfying the following conditions:

- (a) Revenue is measured reliably. When the contracts define that the customers are entitled to return service purchased under specific conditions, the Company shall only record revenue if such specific conditions do not exist and the customers are not entitled to return services provided;
- (b) The Company received or will receive economic benefits from the sale transactions;
- (c) The completed work is determined at the reporting date; and
- (d) Incurred costs for the transaction and the costs to complete the transaction of providing such services is determined.

In case the service provision transaction is performed over many accounting periods, the determination of service revenue in each period is usually performed using the percentage of completion method. According to this method, revenue recorded in the accounting period is determined according to the percentage of completed work.

Recording turnovers from sales of real estate if simultaneously satisfying the following conditions:

- (a) The real estate has completed and transferred to the buyers, enterprises have transferred risks and benefits associated with ownership of the real estate to the buyers;
- (b) Enterprises no longer hold the right to manage the real estate as real estate's owners or the right to control the real estate;
- (c) The turnover is determined reliably;
- (d) Enterprises have received or will receive economic benefits from the sales of the real estate;
- (e) Costs related to sales of the real estate may be determined.

Financial income includes: interest on deposits and loans; payment discounts; foreign exchange gains... Specifically as

- Interest income is recognized reliably on the balances of deposits and periodic actual interest;
- Discounted payments are recognized on notice of suppliers;
- Foreign exchange differences reflect profit from the actual exchange differences of arising transactions denominated in foreign currencies during the period and profit from the exchange differences due to the translation of monetary items denominated in foreign currencies at the reporting date.

Other income reflects income arising from events or transactions separate from the Company's normal business activities, in addition to the revenues mentioned above.

Borrowing costs include interest on loans and other costs directly related to the loans.

Borrowing cost is charged to operation expenses during the period when incurred, except for borrowing costs directly attributable to the investment, construction in progress or production of qualifying assets with appropriate time (more than 12 months) to put into use for the intended purposes or sales, which recorded in value of capitalized assets whether it is subject to the fulfillment of certain conditions of Vietnamese Accounting Standard No. 16 - Borrowing cost. Borrowing costs directly attributable to the construction of fixed assets can be capitalized even though the construction is less than 12 months.

For the general loans using for purposes of the construction or production of qualifying assets, the borrowing costs are capitalized by capitalization percentage of accumulative weighted average expenses for the construction or production of such assets.

The capitalization rate is calculated based on the weighted average interest rate of loans outstanding during the year, excluding specific loans intended for the formation of a specific asset.

Taxation

Corporate income tax includes current income tax and deferred income tax.

Current tax expense reflects the corporate income tax payable incurred during the year and any additional corporate income tax payable due to the discovery of immaterial errors from previous years. Current tax income reflects the corporate income tax payable that is reduced due to the discovery of immaterial errors from previous years.

Deferred tax expense reflects the difference between the deferred tax assets recognized in the year and the deferred tax assets generated in the year, or when the deferred tax liabilities incurred in the year are greater than the deferred tax liabilities that are reversed in the year. Deferred tax reflects the difference between the deferred tax assets generated in the year and the deferred tax assets reversed in the year, or when the deferred tax liabilities reversed in the year are greater than those incurred in the year.

Deferred income tax is calculated on the differences between the carrying amount and the tax base of assets or liabilities in the financial statements, as well as on any unused tax losses and tax incentives. Deferred income tax liabilities must be recognized for all temporary differences, while deferred income tax assets are only recognized when it is probable that there will be sufficient taxable profits in the future to offset the temporary differences.

Deferred income tax is determined based on the tax rate expected to apply in the year when the asset is recovered or the liability is settled. Deferred income tax is recognized in the income statement unless it relates to items directly credited to equity, in which case the deferred income tax is also credited directly to equity.

Deferred income tax assets and deferred income tax liabilities are offset when the Company has a legal right to offset current income tax assets against current income tax liabilities and when the deferred income tax assets and deferred income tax liabilities relate to corporate income tax administered by the same tax authority, and the Company intends to settle current income tax on a net basis.

Taxable income may differ from the total accounting profit before tax presented in the income statement because taxable income does not include taxable income or deductible expenses from other years (including carried forward losses, if any) and also excludes non-taxable or non-deductible items.

The determination of corporate income tax is based on current tax regulations. However, these regulations may change over time, and the final determination of corporate income tax depends on the results of inspections by the competent tax authority.

Related parties

Parties are considered related to the Company if they have the ability to control or significantly influence the Company in making financial and operational policy decisions, or if they share key management members or are under the control of another company (same Corporation).

Individuals with the direct or indirect right to vote that leads to significant influence over the Company, including close family members of these individuals (parents, spouses, children, siblings).

Key management personnel have authority and responsibility for planning, managing and controlling the operation of the Company: the directors, the managers of the Company and close family members of these individuals.

The companies managed by these individuals mentioned above with direct or indirect voting rights or through these rights they can have a significant impact on the Company, including the companies owned by the leaders or major shareholders of the Company and the companies have the same key management personnel.
